YOUR COMMITMENT IS OUR MOTIVATION.

When every second counts, one thing counts above all: reliability.

MAN knows the special challenges of fire and rescue operations inside out – and has done so for decades. With our many years of experience in the development and equipping of emergency vehicles, we deliver solutions that you can rely on when every second counts. The result is our MAN TGE emergency vehicles: well thought-out, ready for action and precisely tailored to your requirements.

In an emergency, you bear responsibility – for your team, for those affected and for everyone on the road. The MAN TGE supports you with maximum safety for all occupants, comprehensive protection for other road users and state-of-the-art technology against digital manipulation. Equipped with a new digital cockpit and numerous intelligent driver assistance systems, the MAN TGE offers maximum comfort, safety and control. So that you can concentrate fully on the essentials: saving lives.

With MAN Individual, we go one step further: we customise your MAN TGE to meet the specific requirements of your application and country-specific specifications. The result is a vehicle that is not only powerful, but also tailored to your needs – and therefore works just as reliably as your team.

MAN TGE FIRE SERVICE VEHICLES.

Every mission is different – but your MAN TGE is always ready.

With our reliable, custom-fit solutions, you're equipped to face every challenge with confidence and reliability.

Available as a panel van or chassis with flexible body options, the MAN TGE covers all fire service needs – from crew transporter to command vehicles, small fire-fighting trucks, and multipurpose vehicles.

Enhances drive systems, intelligent assistance systems, and high-quality fittings ensure you arrive ready to act.

When the heat is on, your focus stays exactly where it should: on the mission.

HIGHLIGHTS.

- Digital cockpit with spacious interior and well thought-out storage system
- Engine or gearbox installed power take-off (PTO)¹ for operating auxiliary devices – ideal for smaller rescue and clean-up missions
- Flexible airline rail system for optimum utilisation of space and quick and easy installation and removal of seats
- Drive variety as required: Front, rear or all-wheel drive (4x4)
- Efficient power transmission thanks to 6-speed manual gearbox (for 103 kW, 120 kW and 130 kW engines) or optional 8-speed automatic transmission¹ (for 103 kW, 120 kW or 130 kW engines)
- Central vehicle control unit processes all bodybuilder signals and provides all relevant vehicle functions and signals
- Intelligent assistance systems such as the standard Emergency Brake Assist (EBA), Crosswind Assist or the Active Lane Keeping Assist can be further expanded with additional systems

¹ Additional equipment at extra charge.

Command vehicle (3.5-5.5 t)

The reliable partner of every incident commander ensures communication across all channels at all times and offers a holistically ergonomic, carefully designed workspace from the driver's seat to the radio room.

Crew transporter (3.5-4 t)

A multifaceted companion for call-outs, it offers a supreme level of mobility with up to 9 seats (8 crew, 1 driver) and a flexible airline rail system for optimal use as well as fast and easy installation and removal of seats.

Multipurpose vehicle (3.5-4 t)

Our all-rounder for a wide variety of uses enables combined transport of crew and equipment.

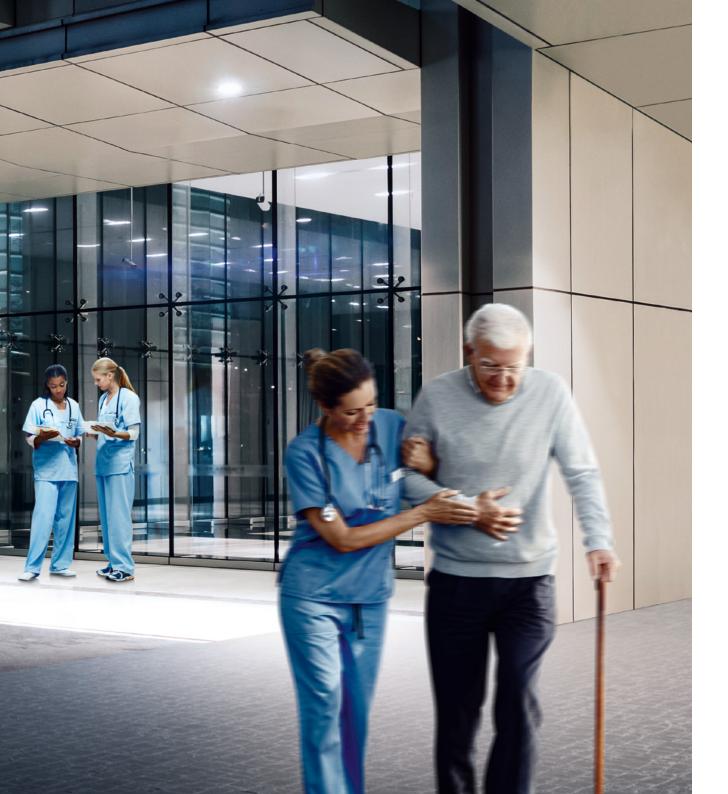

Small firefighting truck (3.5-5.5 t)

The compact vehicle solution with a clever body concept creates plenty of room for gear, equipment and the team. With engine- or gearbox-installed PTO¹ for operating auxiliary devices during smaller rescue and clean-up operations (output up to 20 kW).

¹ Additional equipment at extra charge.

MAN TGE AMBULANCES.

Safe. Comfortable. Ready for Every Call.

Wherever the mission takes you, the MAN TGE ambulance delivers maximum safety and exceptional comfort – for both patient and crew.

Standard features like electromechanical steering, Emergency Brake Assist (EBA) and Active Lane Keeping Assist support your mission. Add optional all-wheel drive and an 8-speed automatic transmission for confident handling in all conditions.

Inside, excellent sound insulation¹ creates a calm atmosphere, while the ergoComfort¹ air-suspended seat helps you stay focused during long shifts.

Developed hand in hand with leading body manufacturers, every detail is made to match your mission. Because every second counts – and every ride matters.

¹ Additional equipment at extra charge.

HIGHLIGHTS.

- **Digital cockpit** with outstanding operating comfort, spacious interior with sophisticated storage system and MAN Media Van infotainment system
- Electrically adjustable driver's seat 'Comfort Plus' combined with excellent sound insulation for a quiet working atmosphere in the cab – for fatigue-free driving even during long shifts
- Adjustable air suspension¹ enables variable load compartment floor heights and thus comfortable entry and exit for patients as well as ergonomic working for the rescue team
- Front, rear or all-wheel drive (4x4) for safe propulsion in all weather conditions and on a wide variety of terrain
- Flexible choice of transmission: 6-speed manual transmission (120 kW) or 8-speed automatic transmission¹ (120 kW) for a smooth, powerful and comfortable drive during operation
- Central vehicle control unit processes all bodybuilder signals and provides all relevant vehicle functions and data
- Intelligent assistance systems such as the Rear View Camera System
 with dynamic guidelines¹, the Emergency Brake Assist (EBA) or the Active
 Lane Keeping Assist can be further expanded with additional systems

¹ Additional equipment at extra charge.

In emergency service operations, focus and efficiency are everything. That's why the new interior of the MAN TGE is designed to keep you sharp, comfortable, and mission-ready - from the first call to the end of your shift. The digital cockpit offers enhanced visibility, ergonomic seating, and intuitive access to all key functions, so you can stay in control during even the most intense responses. With state-of-the-art technology at your fingertips, you can concentrate fully on the task at hand.

1. Digital instrument panel

All important details always in view - the new digital instrument panel makes it possible! It can be customised and shows you everything you need to know at a glance: Speed, mileage, fuel level, coolant temperature and much more.

2. Ergonomic multifunction steering wheel

The redesigned ergonomic multifunction steering wheel is instantly easy to use. New assistance systems and other functions can be selected by pressing a button without taking your hands off the wheel.

3. Kevless Start

Forget about the key! Start and stop your MAN TGE Next Level at the touch of a button. You can leave the key in your

pocket without having to worry about it.

AUTO HOLD

4. Electronic parking brake

No more fumbling with the parking brake. The new electronic parking brake locks and releases at the mere touch of a switch. With Auto Hold, you can easily pull away on uphill gradients or in stop-and-go traffic without rolling backwards.

5. MAN Media Van

With the MAN Media Van infotainment system you have everything in view and many useful functions on board. A DAB+ tuner and a Bluetooth interface for smartphone connection are standard. And with the MAN Media Van Navigation¹ or MAN Media Van Navigation Business¹ options you can reach your destination without detours and with the best possible entertainment along the way.

Why not charge your smartphone while driving? With two USB-C interfaces, you can charge your mobile devices and transfer data in no time at all. A further USB-C interface with charging function is located on the roof console facing the passenger side and in the centre storage compartment of the dashboard as standard.

7. MAN SmartLink

With MAN SmartLink your smartphone becomes a van! Download selected apps to the on-board display and operate them directly from there - conveniently and clearly. Android Auto® and Apple CarPlay® give you full control. And if that's not enough, you also get an inductive charging cradle as standard.

8. Automatic gear lever

Even when things get a bit hectic on the road, you can still enjoy maximum driving comfort! That's because the new automatic gear lever is easy to operate without taking your hands off the wheel. It is now located on the steering column, creating more space in the cab, while ensuring a perfect driving experience and enhanced safety.

Emergency Brake Assist (standard)

The Emergency Brake Assist (EBA) monitors the traffic ahead, gives a visual and acoustic warning if the distance is too short and initiates automatic emergency braking if necessary. In combination with an automatic transmission, it is even possible to brake to a standstill (up to 30 km/h). Rear-end collisions can thus be avoided and the consequences of accidents significantly reduced.

3. Active Lane Keeping Assist (standard)

The system keeps the car in the lane by actively steering it. A multi-function camera constantly monitors the lane markings. From 60 km/h, the system gives a visual and acoustic warning if the vehicle touches or leaves the lane without signaling, and automatically steers the vehicle back into the lane.

5. Cruise Assist³

This assistance system uses a combination of ACC Stop & Go, Active Lane Keeping Assist and Traffic Jam Assist to help the driver maintain distance, speed and lane position. The MAN TGE Next Level actively intervenes in events with semi-automatic control of braking and acceleration processes and lateral steering wheel movements for lane keeping. This ensures safe transport within the limits of the system.

7. Emergency Assist

Call it a guardian angel. We call it Emergency Assist. It permanently monitors whether the driver is operating the steering wheel, gas and brake pedal. In the event of a health impairment or loss of driving ability, the driver may no longer be able to act. In this case, the Emergency Assist takes over vehicle control to bring the vehicle to a stop and then secures it by activating the hazard warning lights and other safety functions.

2. Traffic Sign Information (standard)

The Traffic Sign Information records current signals and traffic signs via the multifunction camera or from the navigation and route data and shows them to the driver on the infotainment display and in the digital instrument panel. This means that nothing important escapes the driver's attention. An EU-Intelligent Speed Assist determines the speed limit and emits a visual and acoustic warning signal if the speed limit is exceeded based on the traffic signs detected and route data looking ahead.

4. Drive Off Warning^{2,5}

Drive Off Warning always helps you get off to a good start. It uses the multifunction camera and radar to monitor the area in front of the car. This makes it much easier to avoid collisions with pedestrians or cyclists when pulling away. The monitoring range of the collision warning can be supplemented by the Blind Spot Warning^{2,5} on the left side, on the right side or on both sides.

6. Cruise Assist Plus^{3,6}

This system is an extension of the Cruise Assist to include the Emergency Assist, which also brakes automatically to a standstill within the limits of the system.

8. Blind Spot Warning^{2,5}

As if there were an extra pair of eyes. The multifunction camera and radar monitor the blind spot area next to the vehicle (left or right, depending on the position of the steering wheel, or optionally on both sides). This significantly reduces the risk of collision with other road users, especially when turning.

The assistance system uses the multifunction camera and radar sensors to monitor oncoming traffic ahead within the limits of the system during the turning manoeuvre. If the system recognises a hazardous situation, it initiates automatic braking due to the extremely short reaction time and simultaneously warns the driver to prevent the vehicle from turning into oncoming traffic.

¹ With automatic transmission and at speed of up to 30 km/h automatic emergency braking to a standstill.

² Standard for vehicles over 3.5 t, N2.

³ Optional equipment at extra cost.

⁴ Only available with ACC Stop & Go and Cruise Assist Plus, therefore available for vehicles with automatic transmission only.

⁵ Optional for vehicles with 3.5 t, N1.

⁶ Available for vehicles with automatic transmission only.

OPTIONAL FEATURES.

Whether you're navigating tough terrain, racing to an emergency, or managing patient care on the move, these advanced options¹ ensure your MAN TGE emergency vehicle is always mission-ready.

Air Suspension¹ - Smooth Ride, Seamless Patient Handling.

The factory-installed air suspension by MAN Individual automatically adjusts to the vehicle's height using intelligent sensors, ensuring a balanced and stable ride. This means enhanced driving comfort for the crew and a smoother experience for patients. When stationary, the height adjustment feature allows for easy stretcher handling and safer patient loading, especially in critical situations.

All-Wheel Drive^{1, 2} - Unstoppable in Any Condition.

Available for vehicles with a gross weight of 3.5 to 5.5 tonnes, the all-wheel drive system delivers superior traction and control. From icy inclines to winding rural roads, your emergency vehicle remains steady, agile, and ready to perform – no matter the weather or terrain.

Automatic Transmission¹ – Focus Where It Matters Most.

The precisely tuned automatic transmission ensures smooth acceleration, lower fuel consumption, and improved comfort behind the wheel. With effortless gear changes, drivers can stay fully focused on traffic and the mission at hand – minimising fatigue and maximising responsiveness when every second counts.

¹ Additional equipment at extra charge.

VEHICLE LINE-UP.

Chassis

Standard

Length: 5,996 mm Wheelbase: 3,640 mm Max. body length⁵:

- · Chassis cab: 3,770 mm
- · Crew cab: 2,700 mm

Long

Length: 6,846 mm Wheelbase: 4,490 mm Max. body length⁵:

- · Chassis cab: 5,550 mm
- · Crew cab: 4,300 mm

Extra-long

Length: 7,211 mm Wheelbase: 4,490 mm Max. body length⁵:

Dimensions refer to models with front-wheel drive, except for extra-long chassis cab vehicles.

- ¹ For wheelbase "long".
- ² Length measured at the vehicle floor incl. subfloor storage compartment extending past the divider wall. Loading length in the upper area of the loading compartment: 3,201 mm.
- ³ Length measured at the vehicle floor incl. subfloor storage compartment extending past the divider wall. Loading length in the upper area of the loading compartment: 4,051 mm.
- ⁴ Length measured at the vehicle floor incl. subfloor storage compartment extending past the divider wall. Loading length in the upper area of the loading compartment: 4,606 mm.
- ⁶ For twin-tyre configuration (if more wheelbases are shown, the value is valid for wheelbase "long").

MAN Service - your partner for reliable support.

We put our customers first and are committed to not only meeting but exceeding your expectations.

Customer-oriented service for your satisfaction.

Our commitment starts with a thorough understanding of your individual needs. Whether it's maintenance, repair or keeping you mobile, we offer solutions tailored to your specific needs.

Expert knowledge and high quality services.

Our team of highly qualified technicians and service staff is ready to provide you with expert advice and professional support. With state-of-the-art technology and outstanding know-how, we ensure that your MAN TGE is always in top condition.

Comprehensive service for your mobility.

From regular inspections to emergency repairs and flexible opening hours at our MAN service centres – we offer you a comprehensive service that ensures your mobility and gives you the peace of mind that your vehicle is in the best of hands. This also includes MAN Mobile24 – available to you 24/7, 365 days a year, throughout Europe.

Comprehensive sales advice.

Our specialised van sales team focuses on your business and your individual requirements. We understand that buying a commercial vehicle is a significant investment, and we are here to help you find the best solution for your needs. From the initial consultation and throughout the vehicle lifecycle, we provide professional support. Our sales team will guide you through the entire purchasing process, answering your questions and making sure you are completely satisfied with your decision.

Industry expertise of MAN sales team.

Our sales team has extensive industry expertise and works closely with qualified body builders. This cooperation allows us to provide tailor-made solutions to meet your individual requirements. Whether it's specific adaptations or customised equipment, our experienced sales team know the requirements of your industry and is always at your side as a strong and competent partner.

At MAN, we understand the importance of a reliable partnership. We are only satisfied when you are.
